Fimbriata Dutchman's Pipe *Aristolochia fimbriata*

A fascinating little Dutchman's Pipe with beautifully patterned, miniature, waterlily-like leaves; incredible, orchid-like flowers, & little watermelon-like seed pods. Not only is this fun to look at, it's a must for butterfly gardening! The Pipevine Swallowtail Butterflies are crazy about it!!! They'll devour it, then it comes right back for more! Tough & fun. Light shade. Moist, well drained soil.
