Yellow Senna ***Cassia corymbosa***

A tall, upright, fast growing shrub with feathery, compound leaves & a bright colorful display of large clusters of 1" yellow blooms from late summer to winter. It's normally evergreen in the Houston & surrounding areas. *Cassia corymbosa* grows 6'-10' tall & can easily be trained into a small "tree". Heat & drought tolerant & deer resistant. Full sun.

**A major butterfly nectar plant
& is a host plant for the Sulphur
Butterfly.**
