

Compact Red Salvia

Salvia coccinea 'Compacta'

The sweet, compact sister of our native Texas Scarlet Sage. This version grows to 24". The blooms are a rich red color and flower over a long season from summer through fall. The bloom spikes are showy, standing well above the foliage. Does well in containers and in the landscape. Makes a good cut flower. Prefers well-drained soil and full sun. **Bees & Hummingbirds!!**
