

Heidi Sheesley of Treeseach Farms

Big Yellow Sage
Salvia madrensis

A striking fall blooming salvia with incredible texture & spectacular 20"-30" long flower spikes of yellow flowers in the fall.

This is a very long lived salvia that forms spectacular upright clumps of very architectural 1/2"-1" square stems covered with a wonderfully textured foliage. The flowers are the icing on the cake! Grows 5'-6' tall & prefers full sun.

Hummingbirds & Butterflies.
